Framework Software	:- Django, Flask
Defect Reporting Tool	:- JIRA
Web Services	:- REST-JSON, DRF(Django Rest Framework)
Development Tools	:- Pycharm, Notepad++
OS and Networking	:- Windows XP, 10, Linux

EDUCATIONAL QUALIFICATION

BCA (Bachelor in Computer Application) from Sant Gadge Baba Amravati University, Amravati, Maharashtra.

PROFESSIONAL EXPERIENCE SUMMARY

Currently working as **Software Engineer (Python Programmer)** with **JarvisSoft Technology**, Pune, from May 2016 to till date.

Project 1:

Project Name :- Automobile component certification
System/ Component :- Automobile

Description:

The project standards are applicable to all kinds of automobiles especially in the areas of environment and safety. Prior to sales of motor vehicles, automotive systems and their components should necessarily have approvals according to the official standards of their destination countries.

The number of rules and norms applying to automobiles has increased globally due to increased emphasis on safety and environmental protection. Automobile and spare part manufacturers and suppliers have to comply with these regulations according to the destination country/ region of their product. These standards aim at improving active and passive car safety, environmental protection as well as the quality of products and production process.

Roles and Responsibilities:

- Designing, coding and implementing several modules of this application
- Involving in developing various API's

- Code fixing and maintenance of the application
- Participating in client calls and involved in the requirement gathering from the clients.
- Responded to application issues by troubleshooting, analysis and assessment of root cause
- Involving in writing until test cases with testing
- Project deployment on testing environment
- Code integration with git

Project 2:

Project Name :- SPDE (Service Provider Delivery Environment)

System/ Component :- Telecom OSS – E2E

Description:

The group of process of communication service provides that responsible to collect data, calculate charging and billing information, produce bills to customer process and manage debt calculation. Telecommunication billing is enterprise application software. Billing information can be grouped to three areas operation, information management and financial management.

Roles and Responsibilities:

- Analyzing the requirement received from the client
- Coding bug-fixing
- Involving in writing until test cases with testing
- Project deployment on testing environment
- Code integration with git
